

I am thrilled to have the opportunity to express myself on the positive effect K-LOVE has had on my life. Having access to this Christian based radio station has been a daily reinforcement of the power,encouragement,and love that is at our disposal. Writting on behalf of my family and I, stating that K-LOVE is quite possibly the very best way to stay connected in faith with everyone that is listening is probably an understatement. This station does so much for so many in our community. It offers help in the form of information, individual contact with pastors, prayer requests, just to name a few. In short this station saves lives! Physically, as well as spiritualy. The number of suicides that are prevented each year is reason enough to keep this station up and running, and in reach of its tremendous listener base. If you add the fact that positive people are much more productive than negative, having this station available in our community has definately had a huge impact on our local economy. I strongly urge, and I pray that the FCC will make the very best decision regarding this matter. Please allow K-LOVE access to the air waves. We all need to be able to tune in.
